## Family Archive Scans (page 1 of 2)

### Save those family photos before they fade away!

Do you have shoe boxes and drawers stuffed full with memories; literally hundreds, if not thousands of old photo prints, slides and negatives just collecting dust? Wouldn't you love to get them organized, share them with family & friends and preserve these treasures for generations to come?

**...Well, we're going to make that job easy—so let's get to it!**

For starters, gather up all those old photos and bring or mail them in. With our high speed scanners we will digitize your entire collection and save it to a USB thumb drive. You can make additional copies for family & relatives, order 4x6 prints or an index booklet. If you discover a particularly cherished image that needs restoration—we can do that too!

Family Archive Scan Packages				
	Prints	Negatives	Slides	Turn-around
25 Photos	\$45	\$58	\$58	3 days
50 photos	\$72	\$92	\$92	
100 photos	\$114	\$147	\$147	7 Days
250 photos	\$230	\$295	\$295	
500 photos	\$365	\$470	\$470	14 days

**Need to keep the photos separated in groups?** That's a reasonable request. After all, photos may need to go back into certain albums or perhaps some are borrowed from family or relatives. Use boxes, envelopes or ziploc bags to organize your originals and we will keep them separate.

**Odd size originals that don't conform with the specifications of this service?** We are a full service professional lab and we can scan almost anything. Whether it be our custom film scans, flatbed scans, or digital capture services, we will have options to get the job done.

**Photo Restoration:** Now that you are sorting through all your old photos, you're bound to come across some one-of-a-kind treasures that need a little TLC. We can restore those damaged, torn and faded pictures. Please see the "Restorations" section of our price list for more information.

**About Scan Resolution:** Our Family Archive Scans will look great on your computer and just as good on a 60 inch flat screen TV. They will easily enlarge to 5x7 or 8x10 prints. If there are certain photos that you want to print larger, then we suggest that just those originals be scanned at a higher resolution with our custom scanning service.
