## Photofinishing (full uncut rolls)

The Frontier Digital Lab has really added a new dimension to Photofinishing. Many of the features listed below were never possible before. But a fancy digital printer alone does not automatically make good prints, it takes skilled technicians, a good eye for color, and a commitment to provide a top quality product. Here at McGreevy ProLab & ProPress our Photofinishing service is designed to meet the needs and expectations of the professional photographer. We never operate our printers in automatic mode. Instead every frame is evaluated for proper color balance and density. The film is cut by hand and sleeved in professional PrintFile® pages. Prints from 35mm negative film include a 4x6 index print.

	35mm Negative Color or B&W		35mm Slide		120 Negative/Trans Color or B&W		* Medium Format Proof Printing Sizes

35mm color negative prints are automatically back imprinted with the proper negative numbers, but prints from slides and B&W film are not. We can hand number proof prints from these film types for an extra \$2.50 per roll. Medium format prints are hand numbered at no extra charge.

Print prices from above calculated as full rolls with 50% film processing discount
