Professional Quality Photo Lab &amp; Press Printing Services

518-426-1039

## Proof Albums

This service is very popular with wedding and event photographers. It offers a professional method to present your clients with all the images from a photo shoot in a single booklet. The images are large enough to order from but small enough to discourage illegal copies. The file name is printed under each image and the pages are numbered. To further enhance the presentation we design a customized cover page absolutely free.

### You have three choices in regard to preprocessing of your digital camera files:

- 1) **No Color Correction** - This is good for photographers who have already done their own color correcting.
- 2) **Automated Color Correction** - The images are processed through our color correction software in "auto mode" without an attendant. There is no additional charge for automated color correction. Although it is certainly no replacement for color correcting decisions made by a real live human, it will improve the overall appearance of the files.
- 3) **Technician Color Corrected** - (Add .17 cents per file) Your files are each individually color corrected by a skilled technician. Our technicians color correct thousands of images each week and have a tremendous amount of experience. Using specialized high production color correction software, we evaluate each image for proper color balance, contrast and density. You can even have the color corrected images burned to a CD for an additional \$7.50. All files for proof albums are downsized to 4x6 at 300ppi prior to color correcting. We do not recommend these files be printed larger than 8x12.
