## Film Processing

We process C-41 and B&W film using Tru Trak hanger transport machines. These dip and dunk systems ensure clean and consistent results, with time, temperature, agitation and replenishment all accurately controlled. With our commitment to the highest standards of quality, control strips are utilized to determine accurate color balance, correct film speed, clean whites (D-min), and rich blacks (D-max). The result is accurate, consistent film processing time and time again.

***We process film once per week on Wednesday. Film must be dropped off by 1:00 PM.***

Film Format	C-41	B&W
35mm	11.00	11.00
120	11.00	11.00
4x5	5.50	5.50
8x10	12.00	12.00

### • 50% Discount
